MEEG 304 Honors Project

The assignment includes all of the following tasks.

1. Locate and read Library journal articles, chapters in a Library books, or Internet articles that relate to the engineering design process or engineering project management. You must read at least 50 pages of material; therefore you may need to read multiple articles or chapters. At least half must be printed material,
   a) Make a photocopy of each article or chapter that you read and used for this assignment.
   b) Prepare a Reference List including each Library article or chapter that you read and used.

2. Complete a Summary, an Analysis and a Discussion/Reflection for the Library material you read and used:
   a) Prepare a brief summary of the 50 pages (no more than 1 page)
   b) Prepare an analysis of the Library material in which you compare at least 5 ideas or concepts found in the Library material with comparable ideas or concepts presented in the UDesign Manual. For each of these 5 ideas or concepts, cite both the page number in the Library article or chapter and the related page number in the UDesign Manual.
   c) Prepare at least 3 pages of discussion/reflective writing about the Library Material and the analysis of it.

3. Based on the results of Task 2, develop a 40-minute team presentation to present your findings to the class. Contributing Honors Students are Hadi Fattah, Hans Mehling, Andy Olenderski, Erik Retzlaff, Chris Richards, Andy Seagraves, and Aaron Winn.
